Election and Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 15-72 and 76-79, drawn to an induction heating coil, a fixing device and an image forming apparatus with the heating coil, classified in class 219, subclass 619.
- II. Claims 73-75, drawn to a method of making an induction heating coil, classified in class 29, subclass 602.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process of Group II can be used for making other induction coils for different uses, such as, transformer or sensing coils or cooking coils, that is, the method of Group II only makes a component of the claimed device of Group I which includes a fixing device and image forming device. Furthermore Group I can be made by another method, as Group I does not require removably connected bobbin members.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

Art Unit: 3742

4. If the applicant elects Group I, Claims 15-72 and 76-79 as the invention to be examined, the applicant is further required to elect a single disclosed species for prosecution on the merits as this application contains claims directed to the following patentably distinct species of the claimed invention:

Figure 6, Figure 7, Figure 9, Figure 10, Figure 11, Figure 13,
Figure 14, Figure 16A, Figure 17A, Figure 18, Figure 19, Figure 22,
Figure 23, Figure 24, Figure 26, Figure 27, Figure 28 and Figures 33.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3742

6. Applicant is advised that the response to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed (as set forth in 37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
